Introduction

Active for years in the digital world with more than 10 years of professional experience in ICT and Internet linked products and services, I would like to invest myself into new projects.

From 2004 to 2007, I've built a great experience and got skills as a multimedia technician and IT Manager. I had great opportunities and worked on innovative projects and big challenges always linked to ICT (web apps, crisis rooms for gas industries, internet hosting (mail, web, DNS, etc.), office services, telephony, data storage and protection, e-marketing, etc.).

From 2007 to 2010, I managed technical, commercial and artistic teams. I got an extended experience as project manager in Internet Services and Products. I managed projects such as Datacenter Infrastructure migration, web agency common products, online payments, IVR developments, hosting, etc.

Those years working in secure environments and trained to data, software and infrastructure security gave me a good knowledge in IT security in general.

This part of my professional life was technically very wealthy thanks to the people I had the chance to work with.

From 2010 to nowadays, I took the head of some companies as technical or general manager. Those companies were all linked to ICT Services (datacenters services, IP Transit, Hosting, Web Agency, E-Marketing, VoIP, etc.).

Since 2013, I started to work freelance to expand my skills and to get more diversity in the projects I work on. I also offer private cloud solutions as IaaS (VPS, cloud drive, etc.), PaaS (web hosting, mail hosting, VoIP) and SaaS (web apps WebUI or API).

Today, I am looking for a new permanent job that will allow me to share my experience and acquire new skills in order to participate in my professional and personal development.

I remain at your disposal for any additional information.

Sincerely yours,

Yannick Molitor

Professional Experience

Myconcept.be – Freelance
Andenne - Belgium

October 2013 until today
